## **DETAILED ACTION**

## Allowable Subject Matter

1. Claims 1-24, 49, and 50 are allowed.

- 2. The following is an examiner's statement of reasons for allowance:
- U. S. Patent No. 6,405,134 to Smith et al. is the reference closest to the claimed invention. Smith et al. disclose a method for electric utility storm outage management, the method comprising: determining an interconnection model of an electric utility power circuit, the power circuit comprising power circuit components; determining information indicative of weather susceptibility of the power circuit components; determining a weather prediction; and determining a predicted maintenance parameter based on the interconnection model, the weather susceptibility information, and the weather prediction. However, Smith et al. do not teach the interconnection model including information about the layout of the power circuit and the interconnectivity of the power circuit components; providing a store of weather susceptibility information for the power circuit components for different weather conditions, wherein the weather susceptibility information for the power circuit component is different for different weather conditions; and determining a predicted maintenance parameter for the power circuit based on the interconnection model, the weather susceptibility information, and the weather prediction; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## **Contact Information**

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carol S. W. Tsai whose telephone number is (571) 272-2224. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on (571) 272-2216. The fax number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 886-217-9197 (toll-free).
